VISCO JET® CRACK - 80 mm

P/N: 036300505

Particularly in the case of applications with very viscous media such as pastes and gels, a very reliable stirring process in the entire vessel without air entry is important. This is what the innovative stirring system VISCO JET® offers!

The particular shape of the blades triggers an intrinsically dynamic flow, which shortens the process times with significantly better mixing results compared to conventional impellers. An all-rounder for aqueous and highly viscous substances. You can find out more about this here.

The VISCO JET® Crack 80 is ideal for vessels with the following characteristics:

- ideal vessel diameter: 133- 200 mm
- ideal ground clearance: 24 mm
- ideal filling level: 133- 200 mm
- ideal volume: 1,900 - 6,300 ml

The VISCO JET® Crack 80 is made of stainless steel
A stirrer shaft with a diameter of 10 mm is included in the scope of delivery.

VISCO JET® CRACK - 80 mm - Technical Data

Blade size	80 mm
Material	stainless steel V4A
Length	500 mm
Shaft diameter	10 mm
For vessel diameter	115 - 200 mm
Rotation speed range	200 - 700 rpm
